

Harley Vickers

Hi fellow shareholders.

Sonapa and myself along with Jacinda, Ethan and little Coco became part of the park in Oct 2014, so yes only 2 years ago. Though we are still relatively new shareholders, we have shown our commitment to being part of the park by the amount of times we are here, nearly using our 100 days each year and by the changes we have made inside and outside to our own space at site 19.

Many of you would have driven past and seen our place changing with the new deck and new gardens and possibly the cabin feeling wallpaper inside as we slowly make this our home away from home for our kids to enjoy, and actually many other kids as they all seem to gather around our place.

This same enthusiasm which I have shown with our own place, I would like to bring to the complete Park by becoming a Park board member.

With 28 years' experience in a diverse electronic industry international and locally and having renovated a number of properties over the years I would bring along a variety of experience I have gained.

I have been involved in another Body Corp committee for the past 7 years, so have knowledge with the requirements and the recent changes with regards Health and Safety policies but overall I wish to bring along a fresh attitude to help ensure the Park is heading in a positive direction and it's shareholders are enjoying their weekend and holiday home the best they can.

I will listen to your requirements and suggestions and endeavour to assist in achieving them or making a solution happen.
